KEY GUIDELINES FOR AUTHORS

- All manuscripts require an abstract which should be informative and not exceed 100 words.
- The total number of references should not exceed 35; multiple references (containing more than one paper) should be avoided.
- The number of figures should not exceed 5 normal-sized figures.
- The manuscript should normally not exceed the equivalent of 2500 words including text, tables and figure captions (approximately 12 double-spaced pages).
- Authors are encouraged to submit a disk with an electronic file exactly matching the hard copy of their manuscript.
- Manuscripts should be sent to one of the editors or preferably to a member of the Advisory Editorial Board who is familiar with the research field. When submitting to an editor, authors are urged to suggest the names of three appropriate referees.

The complete Instructions to Authors are on the last pages of each volume.

KEY GUIDELINES FOR AUTHORS

- All manuscripts require an abstract which should be informative and not exceed 100 words.
- The total number of references should not exceed 35; multiple references (containing more than one paper) should be avoided.
- The number of figures should not exceed 5 normal-sized figures.
- The manuscript should normally not exceed the equivalent of 2500 words including text, tables and figure captions (approximately 12 double-spaced pages).
- Authors are encouraged to submit a disk with an electronic file exactly matching the hard copy of their manuscript.
- Manuscripts should be sent to one of the editors or preferably to a member of the Advisory Editorial Board who is familiar with the research field. When submitting to an editor, authors are urged to suggest the names of three appropriate referees.

The complete Instructions to Authors are on the last pages of each volume.
